Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in Paper No. 9 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner. This is not found persuasive, because Group II is classified in an entirely different search area not pertaining to bearings and would not encompass the same search.

The requirement is still deemed proper and is therefore made FINAL.

2. Claim 18 is withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected method of making, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

Specification

3. The disclosure is objected to because of the following informalities: on page 4, lines 5 and 6, the applicant does not set forth fig. 3 is a different embodiment. This is inconsistent with the remaining specifications. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim language "storage space further comprises an opening that opens towards an axis of said cage" is inaccurate, because the storage space opening 30 opens away from the axis.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Azuma (JP 10-220480).

Azuma discloses a cage with a storage space for a lubricant, said cage comprising at least one storage space (8) for lubricant between two chambers for rotating elements (3), said storage space comprising at least one ^{space b/t legs} outlet for the lubricant, wherein said storage space further comprises an opening that opens towards an axis of said cage;

at least one outlet extends in a generally radial/tangential (open face and slot 9 in communication with rolling elements) direction;

storage space is a recess comprising a bottom generally perpendicular to said axis of said cage, and a lateral wall generally perpendicular to said bottom (6a comprises a lateral wall);

storage space widens outwardly from a bottom to said opening (faces 6a are angled and widen outwardly);

said at least one outlet extends in a generally radial direction of said cage and is shaped as a slot that extends from said opening (space is considered slot);

storage space comprising a plurality of slots that divide an external face of said storage space into generally identical surface portions;

said outlet (9) extends in a tangential direction of said cage and opens into one of said two chambers;

means for operating bearing in a depressurized state.

Conclusion

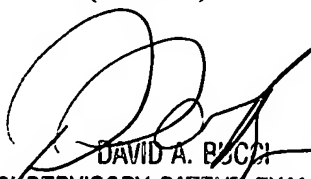

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daikuhara (USPN 6,402,386) and Greener (GB 2 107 003A).
